Specification

Unisex polar fleece sweatshirt, 280 g/m². The POLARIS brushed fleece jacket with a full-length zipper and high collar is designed as a functional thermal layer for workwear and outdoor environments. Its clean and reliable construction focuses on thermal insulation, comfort, and long-term durability, making it suitable for professional use. Made from 100% polyester fleece with a fabric weight of 280 g/m², the material provides effective thermal insulation with relatively low weight. It is soft to the touch, comfortable for extended wear, and stable during frequent washing, while offering easy care and quick drying. The jacket features a high collar with reinforced neck tape, two front zip pockets, elastic rib cuffs, and adjustable elastic drawcords at the hem for improved heat retention. The construction allows it to be worn as an outer layer or as a mid-layer under a jacket or vest. Solid color options are available, with a melange finish in the ash color. The POLARIS model is intended for work uniforms, logistics, service and technical roles, as well as outdoor activities in moderate to cold conditions. The model is unisex, with a women's version also available. Key features: Full-zip fleece jacket • Composition: 100% polyester • Fabric weight: 280 g/m² • Brushed fleece • Thermal insulation • Lightweight and soft • Quick-drying • Easy care • High collar • Reinforced neck tape • Two front zip pockets • Elastic cuffs • Adjustable hem drawcord • Suitable as thermal layer • Available in women's version.
